

# Gather Grand Prix

Last Modified on 05/25/2022 11:22 am EDT

Do all your friends call you Speed Racer? If not, do you want them to?! Find your inner Formula 1 driver in the Gather Grand Prix! Use our template track, complete with obstacles and speed boosts.

## Overview

- **Setup:** The go kart track template is available to [add as a Room](#) to your Space, but it is not available to create as a unique Space. It's also available as a social in the [Rec Room](#) object in Remote Work Spaces. To invite players, just send them the Space URL!
- **Participation Difficulty:** □ □ (super easy)
- **Players:** 2-8 (While up to 25 people can be in the Space for free, there are only 8 karts built into the template. Spectators can use the stage to watch and chat!)
- **Emcee:** Optional for narrating the race
- **Average Time:** 5-30 minutes

## Ready?

Pick a person to be the announcer. They should walk up to the stage, step onto the spotlight tile, and announce the race. There's no formal lap counter or countdown, so the announcer should tell everyone how many laps the race should be.

## Set?

Up to 8 people can race at a time. Racers should walk up to a kart and press "x" to hop on!

**Tip:** There's no lap counter or timer, so make sure the announcer tells everyone ahead of time how many laps you'll race, and then counts down to start the race.

## Go!

Use the arrow or WASD keys to steer, dodging the cones and aiming for the arrows for speed boosts.

**Tip:** The announcer has to decide the winner!

For spectators or an announcer to see the whole race, open **User Settings (Ctrl/⌘+P)**. In **Appearance**, turn off **Smart Zoom** and set the **Manual Canvas Zoom** to 50% or lower.

## Bonus Tips

- Watch or listen to the Speed Racer theme song and/or episodes
  - Watch or listen to Nascar/F1 highlights
  - Stream the Mario Kart soundtrack
-
