

# Recording

Last Modified on 11/01/2021 12:40 pm EDT

Gather currently does not record your screen at any time, and we do not currently provide recording services directly in our platform. However, we welcome you to use any free online tool to record your own Gather events.

Some of our users have used the following free third-party tools for screen recording in Gather:

- OBS Streaming: <https://obsproject.com/>
- Flashback Express: <https://www.flashbackrecorder.com/express/>
- Apowersoft: [https://www.apowersoft.com/free-online-screen-recorder?\\_c=1](https://www.apowersoft.com/free-online-screen-recorder?_c=1)
- Screencast-o-matic: <https://screencast-o-matic.com/screen-recorder>

**Warning:** We are not affiliated with, nor do we offer support for any of these third-party tools; please use at your discretion.

You can upvote this request or add a comment with what recording features you're looking for on the [Record directly from inside Gather](https://feedback.gather.town) thread at <https://feedback.gather.town>.
