

User Role Privileges

Last Modified on 03/28/2022 12:17 pm EDT

The following table is a comparison of all available user roles in Gather. A checkmark (✓) indicates the user role can manage the feature. In most cases, the ability to "manage" a feature means being able to turn it on or off.

A few important details:

- Only Admins can access the Space dashboard.
- Moderators (Mods) are being deprecated from remote work Spaces.
- Member is a role unique to remote work Spaces. A Member can add, but not remove, other Members.
- Some features are only available on Premium Spaces with an upcoming or active reservation.
- Some features are also only available in remote work Spaces or only in events/other Spaces.

Feature Management Available to Each User Role

Feature	Admin	Moderator	Builder	Member (RW-only)
Space Preferences				
Space-wide calendar	✓	✓		
Pin a moderator message (remote-work only)	✓

Assign roles Feature Advanced (Space Dashboard)	 Admin	 Moderator	Builder	Member (RW-only)
Reservations				
Information Board				
Capacity Limit: Customize Warning Text				
Guest list: Upload, Add, Contact, Download, Remove				
Banned Users				
Delete Space				

Footnotes

a: Members can use the Build tool in the Space, not turn the Global Build feature on or off.

b: Moderators can only add or remove other Moderators and Builders. They cannot manage Admin user roles.

c: Moderators and Admins can ban; only Admins can unban.
